Food Waste, Champagne, and
Artificial Intelligence in Aviation

Dr. Alexander Motzek, Lead Data Scientist at zeroG – AI in Aviation, a Lufthansa Group Company

Who is ZEROG?

We're here to answer one simple question:
**What if we could reimagine the world of
aviation through the power of analytics?**

ZERO ^G

LSG group ZERO G

**Outstanding

enhancements

“All beverages hadn’t been cooled correctly. As the cooler had not been working, dry ice should have been used to keep beverages cold.”

Complaint, outbound dock, trolley, temperature, too warm

AF459 CDG-GRU

“The passengers really liked Amuse Bouche Guacamole. It was very praised.”

Compliment, cold food production, starter

Hot Food Production/Poultry:

“Presentation of chicken did not look very good, very messy and a lot of sauce spilled.”

Complaint, hot food production, food quality, portion defect

4 years NLP research

2018:

40.0000 data points
heavy preprocessing
translated

2022:

 labeled data points
no preprocessing
multilingual
similar accuracy

**El champan ha estado
tibia. No hay hielo.**
